

RAJAT GUPTA

React Native Developer | Cross-Platform Mobile (iOS & Android) | AWS Serverless

+91-7015885212 | Rajatg461@gmail.com | linkedin.com/in/rajatgupta-82523523b | Remote / Gurugram, India

SUMMARY

React Native Developer with 2+ years shipping cross-platform mobile apps for iOS and Android, including a production fintech payments app with thousands of active users. Skilled in React Native, TypeScript, Redux/Context API, and TanStack Query, with a track record of cutting API latency and improving responsiveness through performance tuning. Brings a full-stack edge from designing serverless AWS backends (Lambda, DynamoDB, SQS) that power the same mobile features end-to-end. Comfortable working async across time zones.

TECHNICAL SKILLS

Mobile Development: React Native (iOS & Android), Redux & Context API, React Navigation, TanStack Query (React Query), Cross-Platform App Development, REST API Integration, Firebase, JS Performance Optimization

Languages: JavaScript, TypeScript, SQL, C, C++

Backend & Cloud: Node.js, REST APIs, GraphQL, AWS Serverless (Lambda, API Gateway, DynamoDB, SQS, CloudFront)

System Design: Distributed Systems, Microservices, Idempotency, Rate Limiting, Caching, Asynchronous Processing

Testing & DevOps: Jest, Detox, CI/CD Pipelines, GitHub Actions

Tools & Platforms: Git, Postman, Firebase, Xcode, Android Studio

EXPERIENCE

React Native Developer — A3 Ideanix Technology Pvt. Ltd.

Jun 2025 – Present

Gurugram, Haryana, India (Remote-friendly team)

- Build and maintain core mobile features for Breakfree, a fintech payment app with 10K+ active users, using React Native, TypeScript, and Redux/Context API.
- Implemented navigation flows with React Navigation and used TanStack Query to optimize data fetching and caching, cutting redundant API calls by ~35%.
- Designed and developed serverless backend services on AWS Lambda, API Gateway, DynamoDB, and SQS to power payments, messaging, and notification workflows handling 50K+ transactions/month.
- Implemented idempotency and rate-limiting for safe, duplicate-free transactions, and integrated Stripe and Plaid APIs for secure banking and payment processing.
- Wrote unit and end-to-end tests using Jest and Detox, raising test coverage to ~80% and reducing production hotfixes.
- Set up CI/CD pipelines to automate testing and deployment, cutting release turnaround from days to hours.
- Optimized JavaScript performance and CloudFront caching, reducing API latency by ~25% and improving app responsiveness.

Mobile Application Developer — NBCC (India) Limited

Oct 2023 – Jun 2025

New Delhi, Delhi, India

- Developed cross-platform mobile applications using React Native, delivering a consistent experience across iOS and Android from a single codebase, cutting development time by ~40% versus separate native builds.
- Integrated REST APIs, Firebase, and real-time services, improving app responsiveness and reducing screen load times by ~20%.
- Implemented secure authentication flows and optimized UI rendering performance for a user base of 5K+.
- Collaborated closely with backend teams to ensure seamless API integration and end-to-end data consistency.

Software Developer Trainee — PISofttek

Apr 2023 – Sep 2023

Noida, Uttar Pradesh, India

- Built the frontend for a sports management web app using Next.js, Tailwind CSS, and Material UI, based on Figma designs.
- Managed release configuration (build, packaging, deployment) and supported production releases; participated in Agile/Scrum ceremonies across the SDLC.

EDUCATION

Madan Mohan Malaviya University of Technology — B.Tech in Computer Science

2019 – 2023

ACHIEVEMENTS

- Solved 500+ problems on LeetCode (1800+ rating).
- Achieved a 3-star rating on CodeChef (300+ problems solved).
